SUMMARY

Full stack developer completing an intensive program in Portugal, with several products built end-to-end — from database design to production deployment. A background in Accounting helps me understand business logic before I write code. I am currently deepening Java and Spring Boot to strengthen my grasp of object-oriented design and backend architecture, while continuing to build and ship full stack applications. I pick up new stacks quickly and I am used to iterating from direct user feedback.

SKILLS

Currently deepening

Java · Spring Boot · JPA · REST APIs · PostgreSQL · Docker · JUnit · Git

Hands-on experience

React · TypeScript · JavaScript · Node.js · Express · Supabase · MongoDB · MySQL · HTML/CSS · Bootstrap · CI/CD · Vercel

FEATURED PROJECTS

AgendaPro — Service Scheduling Platform

github.com/JaelsonS/service-scheduler · Live: service-scheduler-puce.vercel.app

Started as a technical challenge and extended into a fuller product. Java / Spring Boot REST API with JWT authentication (access + refresh tokens), PostgreSQL with Flyway migrations, and a React / TypeScript frontend, deployed with CI/CD across Vercel and Render.

Teglion — SaaS for Accounting Firms in Portugal

Live: teglion.com · *code private*

Validated with one pilot accounting firm; I collect feedback and ship improvements weekly. Covers client document requests, deadlines and firm-client messaging. Built with React, Node/Express and Supabase (Postgres with Row-Level Security). My Accounting background shapes which features actually matter to accountants.

SaaSude — Management System for Aesthetics & Wellness Clinics

Live: saasude.com · *code private*

One of my largest full stack builds — scheduling, client intake, before/after tracking and a client portal. Currently on hold while I prioritize deepening Java and backend fundamentals; not abandoned.

AfDigital — Web Development Studio (co-founded with my wife)

afdigitalweb.com · *code private*

Early-stage venture building websites and custom systems for small businesses. Current focus: establishing the brand and landing the first clients.

PROFESSIONAL EXPERIENCE

Years in direct sales and client relationships built skills I use daily as a developer — gathering requirements, negotiating scope, and communicating clearly with non-technical stakeholders.

Digi Portugal — Door-to-Door Sales Promoter May 2026 – Present

Linde Saúde — Home Care Technician 2026

Praso Plataforma de Comércio — Sales Consultant → Senior Sales Consultant → Sales Supervisor 2023 – 2025

- Promoted twice internally; led a sales team, tracked performance through a CRM, ran negotiations, and supported team training.

Pet Bontrato — Sales Consultant 2022

Inter Pag — Sales Consultant 2018 – 2021

EDUCATION

Master D Dec 2025 – Dec 2026 (expected)
Full Stack Development Program

Universidade Cruzeiro do Sul 2021 – 2025
Bachelor's Degree in Accounting Sciences

LANGUAGES

Portuguese — Native · English — Learning (daily study)
